- Capture detailed data, fingerprints and more for each visitor or contractor via keyboard, scanner or signature pad
- Streamlined visitor log-in process via pre-registration of individuals or groups using remote console
- Quickly access returning visitor records for fast badge re-issuing
- Store permanent records of all visitors for analysis and reporting
- Emergency Roster function for immediate reporting of signed-in visitors and location
- Incorporate security features ranging from bar codes to smart cards
- Print single cards or batch jobs to any Windows®-based printer, including dedicated label and PVC card printers
- Multi-level password login protects data

Step 1. Schedule

No longer do you have to call or walk down to the front desk or security officer to schedule a visitor appointment. With BadgeBuilder® Visitor, users quickly and conveniently enter visitor appointment details via a wizard-driven browser console their networked PC. The appointment data is logged in a centralized database for access by entry point personnel.

BadgeBuilder® Visitor provides access to a variety of badge design tools to create custom badge layouts and sizes incorporating text, logos and backgrounds. Advanced security features ranging from bar codes to smart cards are also available.

Step 2. Capture

As a visitor arrives, entry-point personnel quickly locate the scheduled appointment by searching on any number of criteria. They also have the option to enter a new appointment for an unannounced visitor.

With the ability to apply images to a record, BadgeBuilder® Visitor simplifies the task of adding one or more photos, a scan of a drivers license or business card, and signature to a card.

Step 3. Print

Quickly print temporary or permanent visitor badges, vehicle parking passes and more with the ability to create any badge size or layout. You can also enhance security by printing on time-expiring or light-sensitive badges.

Step 4. Data Management

Permanent records of all visitors, associated appointments and escorts are logged for analysis and reporting.

BadgeBuilder® Visitor is a member of the BadgeBuilder® Family of Badging Products.

Streamlined, network-ready, and easy-to-learn, BadgeBuilder® Visitor provides an affordable entry-point security solution for any sized company.

Utilizing the powerful BadgeBuilder® photo ID software engine, BadgeBuilder® Visitor enhances corporate image while increasing visitor accountability and employee safety.
